

TaurEye - Progress Report

NSE/BSE EOD stock screener (web + Android) · status as of 11 Jun 2026

1. Progress - what's built & live

Area	Item	Status	Notes
Screening	Filter screener + Natural-language screener	Live	Over the ~5,800-stock metrics bundle; plain-English signature feature
Screening	Saved screens	Live	Local; cloud table in schema
Charts	Native + TradingView charts, MAs, timeframes	Live	lightweight-charts + TV widget toggle
Charts	Auto pattern detection + per-stock Key Data	Live	Patterns drawn; RSI/SMA/52w/ATR + SEBI disclaimer
Data view	Global indices dashboard + ticker, scrip search	Live	
Engagement	Watchlists, EOD price alerts, push (FCM), theme	Live	Firebase push for alerts
Accounts	Email/password + guest auth	Live	Supabase Auth
Accounts	Social logins (Google, X, GitHub, Apple, Facebook)	Built	Code live; each provider must be ENABLED in Supabase
Accounts	Cloud credit wallet (server-side, RLS)	Live	Unforgeable balance + ledger
Accounts	Signup bonus (50) + daily claim (5)	Live	Secure SECURITY DEFINER RPCs
AI	AI stock analysis (Claude Haiku)	Live	Deployed Edge Function; markdown-formatted output
AI	AI Report -> printable PDF (credit-linked)	Built	Deploy the ai-report Edge Function to switch on
Monetization	Broker affiliate (Zerodha)	LIVE & earning	Angel/Upstox/Dhan = paste links
Monetization	Ads - AdSense (web) + AdMob (app)	Built	Gated; need publisher/ad-unit IDs (AdMob also APK rebuild)
Monetization	Razorpay credit purchases	Built	Needs Razorpay account + webhook
Monetization	Credit charging	Off (by design)	Flip CHARGE_CREDITS after AI + purchases live
Data pipeline	Nightly EOD pull + CA-adjust + JSON export	Live	On the Oracle VM
Data pipeline	Fundamentals tables + per-symbol funda export	Built	financials / balance_sheets / shareholding / announcements
Data pipeline	Corporate actions (free, in export)	Live	Splits/bonus/dividends

Area	Item	Status	Notes
Data pipeline	BSE financials / shareholding / announcements	Blocked	BSE bot-walls datacenter IPs - proven dead end
Data pipeline	EODHD vendor integration (deep fundamentals)	Built, dormant	Deferred - \$99/mo plan; flips on with one secret
Platforms	Web (static, nginx) + Android APK build	Live	Deploys from main in ~1 min
Platforms	OTA updates (Capgo) + phone Data-ops workflow	Wired	Capgo needs token/enable; ops workflow live
Compliance	SEBI factual + disclaimers, RLS, server-only keys	Live	No advice; closed-loop credits

2. Pending - actions to ship the rest

Priority	Item	Owner	Action
Now	Enable Google + GitHub social providers	You	Supabase -> Auth -> Providers (+ client id/secret + callback URL)
Now	Show only enabled social buttons	You	Set repo variable VITE_OAUTH_PROVIDERS=google,github
Now	Turn on AI Report	You	Deploy 'ai-report' Edge Function (dashboard paste); reuses ANTHROPIC_API_KEY
Now	Publish corporate actions to the app	You	Run 'export --funda --gz' via the phone Data-ops workflow
Earn	Add Angel One / Upstox / Dhan affiliate links	You	Paste tracking URLs into src/config/brokers.ts
Earn	Web ads	You	AdSense account -> set VITE_ADSENSE_CLIENT + slot IDs
Earn	App ads	You	AdMob app + IDs + privacy policy, then one APK rebuild
Payments	Razorpay credit purchases	You	KYC + create payments (notes user_id/product_id) + webhook URL
Payments	Flip credit charging on	Dev	After purchases live: set CHARGE_CREDITS=true, drop client-side AI debit
Payments	GST registration (18% on credit sales)	You	Before charging real money
Data	Decide deep-fundamentals vendor	You	EODHD \$99/mo (or alt) -> unlocks balance sheet/debt/holdings in report
Mobile	OTA one-time setup	You	Capgo account -> CAPGO_TOKEN secret + CAPGO_ENABLED=true
Backlog	Wire referral reward grant	Dev	Tables/page exist; grant credits on qualified referral
Backlog	Pro subscription tier (Rs 999/yr)	Dev	After purchases; shared infra
Backlog	Growth multipliers	Dev	SEO screen landing pages, shareable/community screens, preset library
Backlog	Native social login	Dev	Capacitor deep-link handling + APK rebuild

Headline: the product is fully usable today - screener, charts, patterns, NL search, watchlists, alerts, accounts (incl. social-login code), cloud wallet with real credits, live AI analysis, and the Zerodha affiliate already earning. What's pending is mostly your external accounts (ad IDs, Razorpay, social-provider keys) and the deliberate switch-ons (deploy ai-report, flip charging). Deep fundamentals (balance sheet/debt/holdings) await a data vendor; everything else is built to plug it in.
